

INSTALLING IVANTI ON MAC

1. First, download the Ivanti installation file (.dmg) by clicking [here](#).
2. Once the download is complete, open the downloaded .dmg file by double-clicking on it. This will mount the disk image.
3. You should now see a window showing the Ivanti installer package. Double-click on the package to start the installation process.
4. A dialog box will appear asking you to confirm that you want to install Ivanti. Click the "Continue" button to proceed.
5. Next, you will be presented with the License Agreement. Read through the agreement, and if you agree with the terms, click the "Agree" button to continue.
6. In the next window, you will be asked to select the destination where Ivanti will be installed. By default, Ivanti will be installed in the "Applications" folder. If you wish to change the installation location, click the "Change Install Location" button and select the desired folder.
7. Click the "Install" button to start the installation process. You may be prompted to enter your Mac's administrator password. Enter the password and click "OK" to proceed.
8. The installation process will begin, and you will see a progress bar indicating the progress of the installation.
9. Once the installation is complete, a message will be displayed indicating that the installation was successful.
10. You can now close the Ivanti installer window, and the Ivanti application will be ready to use in your "Applications" folder.

SETTING UP IVANTI ON MAC

1. Click on the Finder icon in your Dock to open Finder.
2. In the left sidebar of the Finder window, click on "Applications" to open the Applications folder.
3. Scroll down to find the Ivanti application and double-click on it to open it.
4. In the Ivanti window that opens, click on the "+" button to add a new VPN connection.
5. In the "Name" field, enter a name for the VPN connection (e.g., "Montgomery County VPN").
6. In the "Server URL" field, enter the following URL:
secure2.montgomerycountymd.gov/mac
7. Once you have entered all the required information, click on the "Add" button to save the VPN connection.
8. To connect to the VPN, click on the VPN connection in the Ivanti application and then click on the "Connect" button.
9. Enter your VPN username and password when prompted, and then click on the "Connect" button.
10. Once you are connected to the VPN, you can access secure resources on the Montgomery County network.
