

Committee: TE
Committee Review: At a future date
Staff: Jim Ogorzalek, Legislative Attorney
Purpose: To receive testimony – no vote expected

AGENDA ITEM #11
September 15, 2026
Public Hearing

SUBJECT

Bill 35-26, Forest Conservation – Trees – Applicability – Brush Management

Lead Sponsors: Councilmember Sayles and Council Vice President Balcombe

Co-Sponsor: Councilmembers Luedtke, Katz, and Evans

EXPECTED ATTENDEES

Members of the public

COUNCIL DECISION POINTS & COMMITTEE RECOMMENDATION

Receive public testimony

DESCRIPTION/ISSUE

Bill 35-26 would:

- (1) clarify that the forest conservation requirements do not apply to routine vegetation maintenance in conformance with certain federal standards on agricultural land; and
- (2) generally amend the law regarding forest conservation.

MEMORANDUM

September 10, 2026

TO: County Council

FROM: Jim Ogorzalek, Legislative Attorney

SUBJECT: Bill 35-26, Forest Conservation – Trees – Applicability – Brush Management

PURPOSE: To receive testimony – no Council vote expected

Bill 35-26, Forest Conservation – Trees – Applicability – Brush Management was introduced on July 21, 2026. Its Lead Sponsors are Councilmember Sayles and Council Vice President Balcombe. Its Co-Sponsors are Councilmembers Luedtke, Katz, and Evans. A public hearing is scheduled for September 15, 2026, at 1:30 p.m. A worksession of the Transportation & Environment (TE) Committee is tentatively scheduled for Monday, October 19, 2026, at 9:30 a.m.

Bill 35-26 would:

- (1) clarify that the forest conservation requirements do not apply to routine vegetation maintenance in conformance with certain federal standards on agricultural land; and
- (2) generally amend the law regarding forest conservation.

Background

Under current law, any person “who expects to cut, clear, or grade more than 5,000 square feet of forest or any champion tree must request an exemption” from the forest conservation law’s requirements from the Planning Department. M.C.C. § 22A-4. Prior to performing such work, the person must receive “confirmation from the Planning Director that the activity is in fact exempt” because “[p]erforming any cutting, clearing, or grading before the Director confirms that an exemption applies is a violation of this Chapter.” M.C.C. § 22A-4.

Bill Specifics

Bill 35-26 would clarify the relationship between certain agricultural activity and the exemption process. Specifically, the bill provides that routine vegetation maintenance performed on land used or intended for use as agriculture need not obtain a written exemption from the Planning Director if it falls within one of two scenarios: (1) the work is performed in accordance with the United States Department of Agriculture Natural Resources Conservation Service’s Field

Office Technical Guide and approved by the Soil Conservation District within a soil conservation and water quality plan; or (2) the work is performed in accordance with the United States Department of Agriculture Natural Resources Conservation Service’s Conservation Practice Standard 314 for brush management. If the work to be performed falls within one of those two subsets, the requirements of the forest conservation law do not apply and the work may be performed without an advance written exemption from the Planning Department.

SUMMARY OF IMPACT STATEMENTS*

Climate Assessment. “The Office of Legislative Oversight (OLO) anticipates Bill 35-36 will have no impact on the County’s contribution to addressing climate change as it is proposing changes to an existing exemption process for routine vegetation maintenance on agricultural land.”

Racial Equity and Social Justice Impact Statement. “The Office of Legislative Oversight (OLO) anticipates Bill 35-26 could have a negative impact on racial equity and social justice (RESJ) in the County. Reducing administrative requirements related to vegetation maintenance as proposed in Bill 35-26 could disproportionately benefit White community members and decrease tree planting in Black, Indigenous, and other People of Color (BIPOC) communities.”

COUNTY COUNCIL FOR MONTGOMERY COUNTY, MARYLAND

Lead Sponsors: Councilmember Sayles and Council Vice President Balcombe
Co-Sponsor: Councilmember Luedtke

AN ACT to:

- (1) clarify that the forest conservation requirements do not apply to routine vegetation maintenance in conformance with certain federal standards on agricultural land; and
- (2) generally amend the law regarding forest conservation.

By amending

Montgomery County Code
Chapter 22A, Forest Conservation - Trees
Section 22A-4

Boldface	<i>Heading or defined term.</i>
<u>Underlining</u>	<i>Added to existing law by original bill.</i>
[Single boldface brackets]	<i>Deleted from existing law by original bill.</i>
<u>Double underlining</u>	<i>Added by amendment.</i>
[[Double boldface brackets]]	<i>Deleted from existing law or the bill by amendment.</i>
* * *	<i>Existing law unaffected by bill.</i>

The County Council for Montgomery County, Maryland approves the following Act:

Sec. 1. Section 22A-4 is amended as follows:

22A-4. Applicability.

Except as otherwise expressly provided in this Chapter, this Chapter applies to:

* * *

(g) clearing or grading conducted on [two] 2 or more platted contiguous lots:

(1) that collectively total 40,000 square feet or larger;

(2) that are graded at the same time; and

(3) where sediment control is required.

Notwithstanding the above, any person who expects to cut, clear, or grade more than 5,000 square feet of forest or any champion tree must request an exemption under Section 22A-5 or must comply with the requirements of Article II. Any person who believes that cutting, clearing, or grading is exempt under Section 22A-5, 22A-6, or 22A-8 must receive confirmation from the Planning Director that the activity is in fact exempt from Article II. Performing any cutting, clearing, or grading before the Director confirms that an exemption applies is a violation of this Chapter.

The requirements of this Chapter do not apply on land used or intended for use as agriculture to routine vegetation maintenance performed in accordance with the United States Department of Agriculture Natural Resources Conservation Service's Field Office Technical Guide and approved by the Soil Conservation District within a soil conservation and water quality plan or performed in accordance with the United States Department of Agriculture Natural Resources Conservation Service's Conservation Practice Standard 314 for brush management. Performance of such routine vegetation management does not require a waiver or written exemption from the Planning Director as otherwise set forth in this Chapter or applicable regulation.

28 The Planning Director must notify the Department of Permitting Services if this
29 Chapter would apply to any cutting, clearing, or grading of which the
30 Department would otherwise not be notified.

Climate Assessment

Office of Legislative Oversight

BILL 35-26: FOREST CONSERVATION – TREES – APPLICABILITY – BRUSH MANAGEMENT

SUMMARY

The Office of Legislative Oversight (OLO) anticipates Bill 35-36 will have no impact on the County's contribution to addressing climate change as it is proposing changes to an existing exemption process for routine vegetation maintenance on agricultural land.

BACKGROUND AND PURPOSE OF BILL 35-26

Currently under County Code, any person "who expects to cut, clear, or grade more than 5,000 square feet of forest or any champion tree must request an exemption" from the Planning Director.¹

Bill 35-26 seeks to clarify the relationship between specific agricultural activity and the exemption process. Specifically, it would clarify that routine vegetation maintenance performed on land used or intended for use as agriculture would not need to obtain a written exemption from the Planning Director if:

- The work is performed "in accordance with the United States Department of Agriculture Natural Resources Conservation Service's Field Office Technical Guide and approved by the Soil Conservation District within a soil conservation and water quality plan"; or
- The work is performed in accordance with the Department's Conservation Practice 314 for brush management.²

Bill 35-26 was introduced by the County Council on July 21, 2026.

ANTICIPATED IMPACTS

As the Bill is proposing changes to an existing exemption process for routine vegetation maintenance on agricultural land, OLO anticipates Bill 35-26 will have no impact on the County's contribution to addressing climate change, including the reduction and/or sequestration of greenhouse gas emissions and community climate resilience.

RECOMMENDED AMENDMENTS

The Climate Assessment Act requires OLO to offer recommendations, such as amendments or other measures to mitigate any anticipated negative climate impacts.³ OLO does not offer recommendations or amendments as Bill 35-26 is likely to have no impact on the County's contribution to addressing climate change, including the reduction and/or sequestration of greenhouse gas emissions and community climate resilience.

CAVEATS

OLO notes two caveats to this climate assessment. First, predicting the impacts of legislation upon climate change is a challenging analytical endeavor due to data limitations, uncertainty, and the broad, global nature of climate change. Second, the analysis performed here is intended to inform the legislative process, not determine whether the Council should enact legislation. Thus, any conclusion made in this statement does not represent OLO's endorsement of, or objection to, the bill under consideration.

PURPOSE OF CLIMATE ASSESSMENTS

The purpose of the Climate Assessments is to evaluate the anticipated impact of legislation on the County's contribution to addressing climate change. These climate assessments will provide the Council with a more thorough understanding of the potential climate impacts and implications of proposed legislation, at the County level. The scope of the Climate Assessments is limited to the County's contribution to addressing climate change, specifically upon the County's contribution to greenhouse gas emissions and how actions suggested by legislation could help increase the County's community climate resilience.

While co-benefits such as health and cost savings may be discussed, the focus is on how proposed County bills may impact GHG emissions and community resilience.

MEMORANDUM

August 5, 2026

TO: Natali Fani-González, President
Montgomery County Council

FROM: Jennifer R. Bryant, Director
Office of Management and Budget 

SUBJECT: Extension Request: Fiscal Impact Statement for Bill 35-26, Forest
Conservation – Trees – Applicability – Brush Management

As required by Section 2-81A of the Montgomery County Code, we are informing you that the transmittal of the fiscal impact statement for the above-referenced legislation will be delayed because more time is needed to collect information and conduct a meaningful analysis on the bill. We are requesting an extension and will transmit the fiscal impact statement no later than August 25, 2026.

Racial Equity and Social Justice (RESJ) Impact Statement

Office of Legislative Oversight

BILL 35-26: FOREST CONSERVATION - TREES - APPLICABILITY - BRUSH MANAGEMENT

SUMMARY

The Office of Legislative Oversight (OLO) anticipates Bill 35-26 could have a negative impact on racial equity and social justice (RESJ) in the County. Reducing administrative requirements related to vegetation maintenance as proposed in Bill 35-26 could disproportionately benefit White community members and decrease tree planting in Black, Indigenous, and other People of Color (BIPOC) communities.

PURPOSE OF RESJ IMPACT STATEMENTS

RESJ impact statements (RESJIS) evaluate the anticipated impact of legislation on racial equity and social justice in the County. RESJ is a **process** that focuses on centering the needs, leadership, and power of Black, Indigenous, and other People of Color (BIPOC) and communities with low incomes. RESJ is also a **goal** of eliminating racial and social inequities. Applying a RESJ lens is essential to achieve RESJ.¹ This involves seeing, thinking, and working differently to address the racial and social inequities that cause racial and social disparities.²

PURPOSE OF BILL 35-26

County law requires that any person “who expects to cut, clear, or grade more than 5,000 square feet of forest or any champion tree must request an exemption” from the Planning Director.³

The purpose of Bill 35-26 is to clarify the exemption process for specific agricultural activity. If enacted, Bill 35-26 would clarify that routine vegetation maintenance performed on agricultural land would not need to obtain a written exemption. This would apply if:⁴

- The work is performed “in accordance with the U.S. Department of Agriculture (USDA) Natural Resources Conservation Service’s Field Office Technical Guide⁵ and approved by the Soil Conservation District⁶ within a soil conservation and water quality plan”; or
- The work is performed in accordance with the USDA’s Conservation Practice 314⁷ for brush management.

According to its lead sponsors, Bill 35-26 intends to reduce regulatory burdens on farmers while maintaining environmental protections.⁸

The Council introduced Bill 35-26 on July 21, 2026.

This RESJIS builds on the ones for:

- Zoning Text Amendment (ZTA) 23-09, Farming – Incidental Outdoor Stays, published in January 2024, which provides racial equity context on the Agriculture Reserve and agricultural businesses;⁹ and
- Bill 25-22, Forest Conservation – Trees, published in October 2022, which provides racial equity context on the climate gap and tree cover.¹⁰

RESJ Impact Statement

Bill 35-26

ANTICIPATED RESJ IMPACTS

According to Montgomery Planning staff, farmers are currently allowed to perform routine vegetation maintenance on agricultural land without obtaining a written exemption, as long as the maintenance does not involve clearing of forest. As introduced, Bill 35-26 would effectively allow anyone (including farmers, developers and others) to clear forest on agricultural land without a written exemption if they claim it is used or intended to be used for agricultural activity.¹¹

To consider the anticipated impact of Bill 35-26 on RESJ in the County, OLO recommends the consideration of two related questions:

- Who would primarily benefit or be burdened by this bill?
- What racial and social inequities could passage of this bill weaken or strengthen?

Community members who perform routine vegetation maintenance on agricultural land would benefit from not needing to obtain a written exemption from Planning for this work. This would likely save them time and costs associated with requesting the exemption. Most of the County's agricultural land is located within the Agricultural Reserve (AR). As shown in Figure A (Appendix), White community members are overrepresented in most Census tracts within the AR. Asian community members are overrepresented within a few Census tracts in the AR, while Latinx community members are overrepresented in one Census tract in the AR. None of the Census tracts in the AR have a disproportionate representation of Black community members.

Community members who live in Equity Focus Areas could be burdened by less tree planting in their communities. To help conserve forest, the County's Forest Conservation Law requires the planting of forest or trees whenever forest is cleared in the County.¹² Regulations for the law encourage tree planting in Equity Focus Areas (EFAs) to meet planting requirements for clearing forest.¹³ EFAs are Census tracts in the County with high concentrations of BIPOC community members, lower-income households, and households with limited English proficiency.¹⁴

According to Planning staff, Bill 35-26 could lead to more clearing of forest that is not subject to the County's Forest Conservation Law.¹⁵ This could lead to less tree planting in EFAs than would happen otherwise. Notably, racial inequities in tree cover exacerbate environmental burdens like the urban heat island effect and air pollution in BIPOC communities.¹⁶

Taken together, OLO anticipates Bill 35-26 could have a negative impact on RESJ in the County.

RECOMMENDED AMENDMENTS

The County's RESJ Act requires OLO to consider whether to recommend amendments to bills that could reduce racial and social inequities and advance RESJ.¹⁷ OLO anticipates Bill 35-26 could have a negative impact on RESJ in the County. Should the Council seek to improve the RESJ impact of this Bill, OLO offers one policy option for Council consideration:

- **Engage County and environmental justice stakeholders to update Bill 35-26.** The Council can consider engaging County stakeholders such as the Planning Department and environmental justice stakeholders that advocate with BIPOC community members to amend Bill 35-26. Specifically, the Council could partner with stakeholders to determine amendments to offset decreased tree planting in BIPOC communities that may result from this Bill.

RESJ Impact Statement

Bill 35-26

CAVEATS

Two caveats to this RESJIS should be noted. First, predicting the impact of bills on RESJ is challenging due to data limitations, uncertainty, and other factors. Second, this RESJIS is intended to inform the Council's decision-making process rather than determine it. Thus, any conclusion made in this statement does not represent OLO's endorsement of, or objection to, the bill under consideration.
